PHILOSOPHY

With innovation, expertise and with a lot of heart.

Close to people, safe in motion. For more than 20 years pfautech has been committed to safe and self-determined mobility in all stages of life. With innovation, expertise and a lot of heart in the right place, we create tried and tested aids for people with and without disabilities. From bicycles suitable for therapy to special tricycles – we are convinced that forward-looking means of transport create new dimensions of freedom and quality of life. All our aids are subject to the strictest quality controls and are produced exclusively in our in-house workshops. Close work for and especially with people is of great importance to us: In our company, people with disabilities are employed in a variety of ways, thus creating the basis for a lively and diverse corporate culture.

WE are approachable

More than just a meeting place
for assistance

WE are local

Try first, buy later

WE provide safety

Our experience for your comfort

WE are “made in Germany”

Developed and produced in Germany

PRODUCTION

Quality at its best.

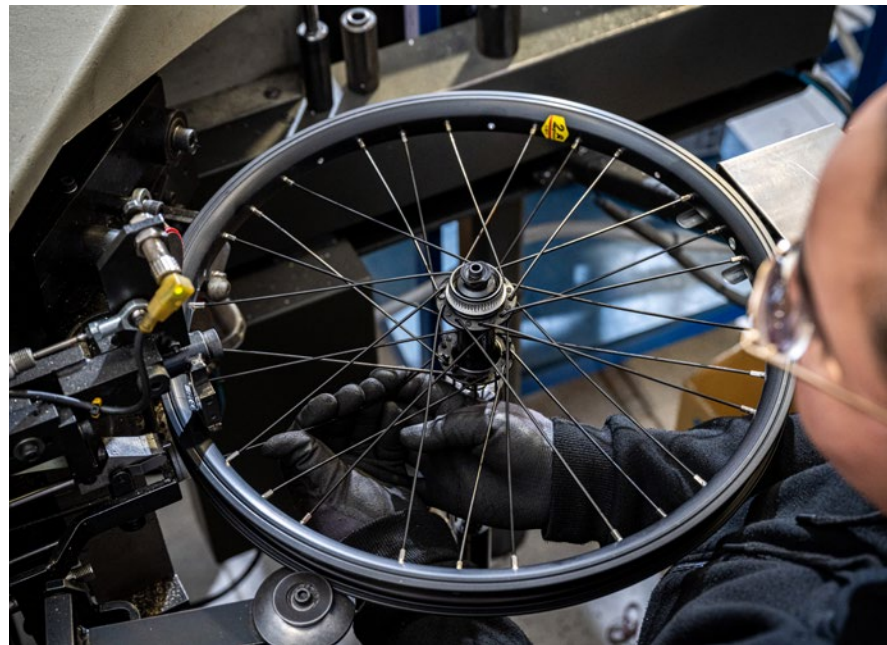

Innovation begins in Quakenbrück because our tried and tested bicycles are produced entirely in-house, from the initial design to the construction **and complete assembly.**

THE SEVEN STEPS TO CREATE YOUR SPECIAL BICYCLE

- ✓ Body shell
- ✓ Welding shop
- ✓ Sandblasting
- ✓ Painting
- ✓ Spoke shop
- ✓ Warehouse/picking
- ✓ Assembly

FRAME SHAPES

A tricycle that suits you!

We offer a wide range of frame types with different equipment and motorisation options that are tailored to different needs. Every person is unique and the feeling of riding a tricycle is just as individual. That's why we have a wide range of products that suit every need – for a safe, comfortable and completely harmonious riding experience.

RECUMBENT TRICYCLE

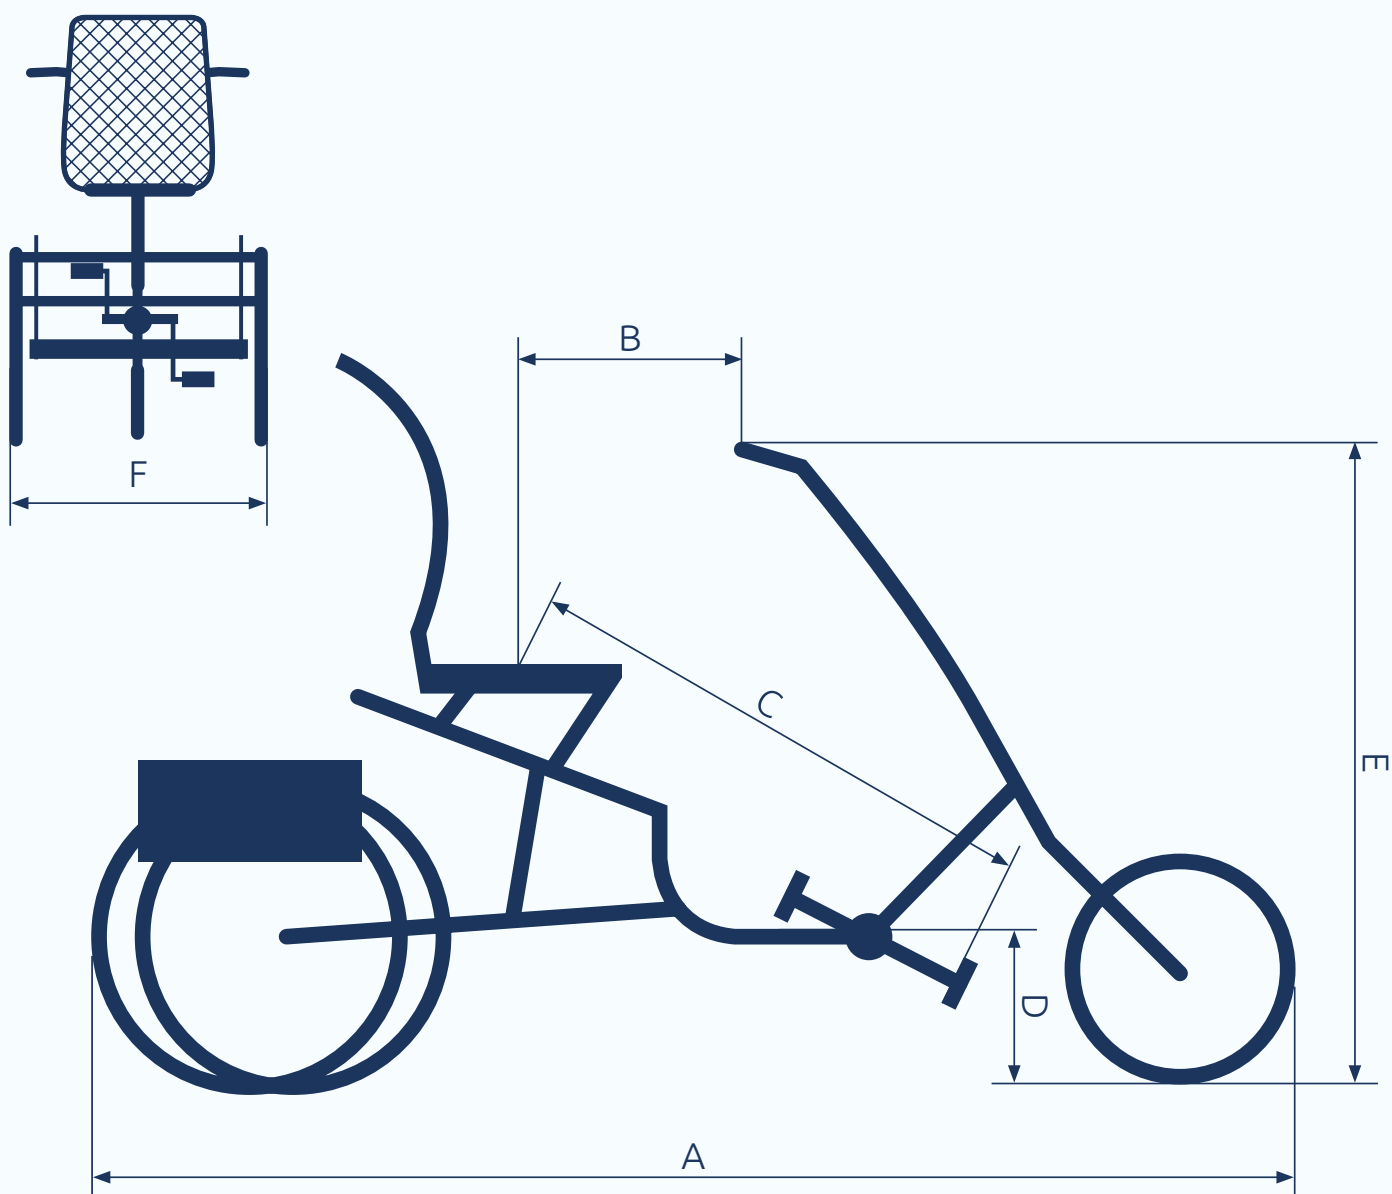

Scoobo series – sporty and powerful.

Scoobo Smart

Scoobo+

The Scoobo series impresses with its easy handling and powerful Bosch motor. Thanks to the well-designed frame and small front wheel, the center of gravity is very low. This makes it easy to maneuver and provides a feeling of safety on any trip.

A comfortable seat that can be individually adjusted in terms of height and tilt adds extra comfort to the Scoobo. For those who want a little bit more, the Scoobo Smart is also available in the Plus version. The classic Scoobo Smart is already a real all-rounder—with a solid Bosch motor and 7-speed gear hub. But the Scoobo+ is a step up: more power under the hood and a sporty Rohloff 14-speed gear hub for those who not only want a comfortable ride but also want some extra power.

RECUMBENT TRICYCLE

Movi – Compact. Powerful. Comfortable.

Movi

Thanks to its short and agile design, the recumbent tricycle is easy to maneuver, even in tight spaces. The air-suspended seat provides a high level of riding comfort. The height and tilt of the seat can be individually adjusted to suit the rider. The easily accessible parking brake on the handlebar ensures safe mounting and dismounting.

The belt drive ensures quiet, clean, and low-maintenance operation. The Bosch motor provides powerful assistance and a smooth, dynamic riding experience.

With a recumbent tricycle,
cycling is fun even in old age –
even at the age of 94, every
ride is a pleasure!

RECUMBENT TRICYCLE

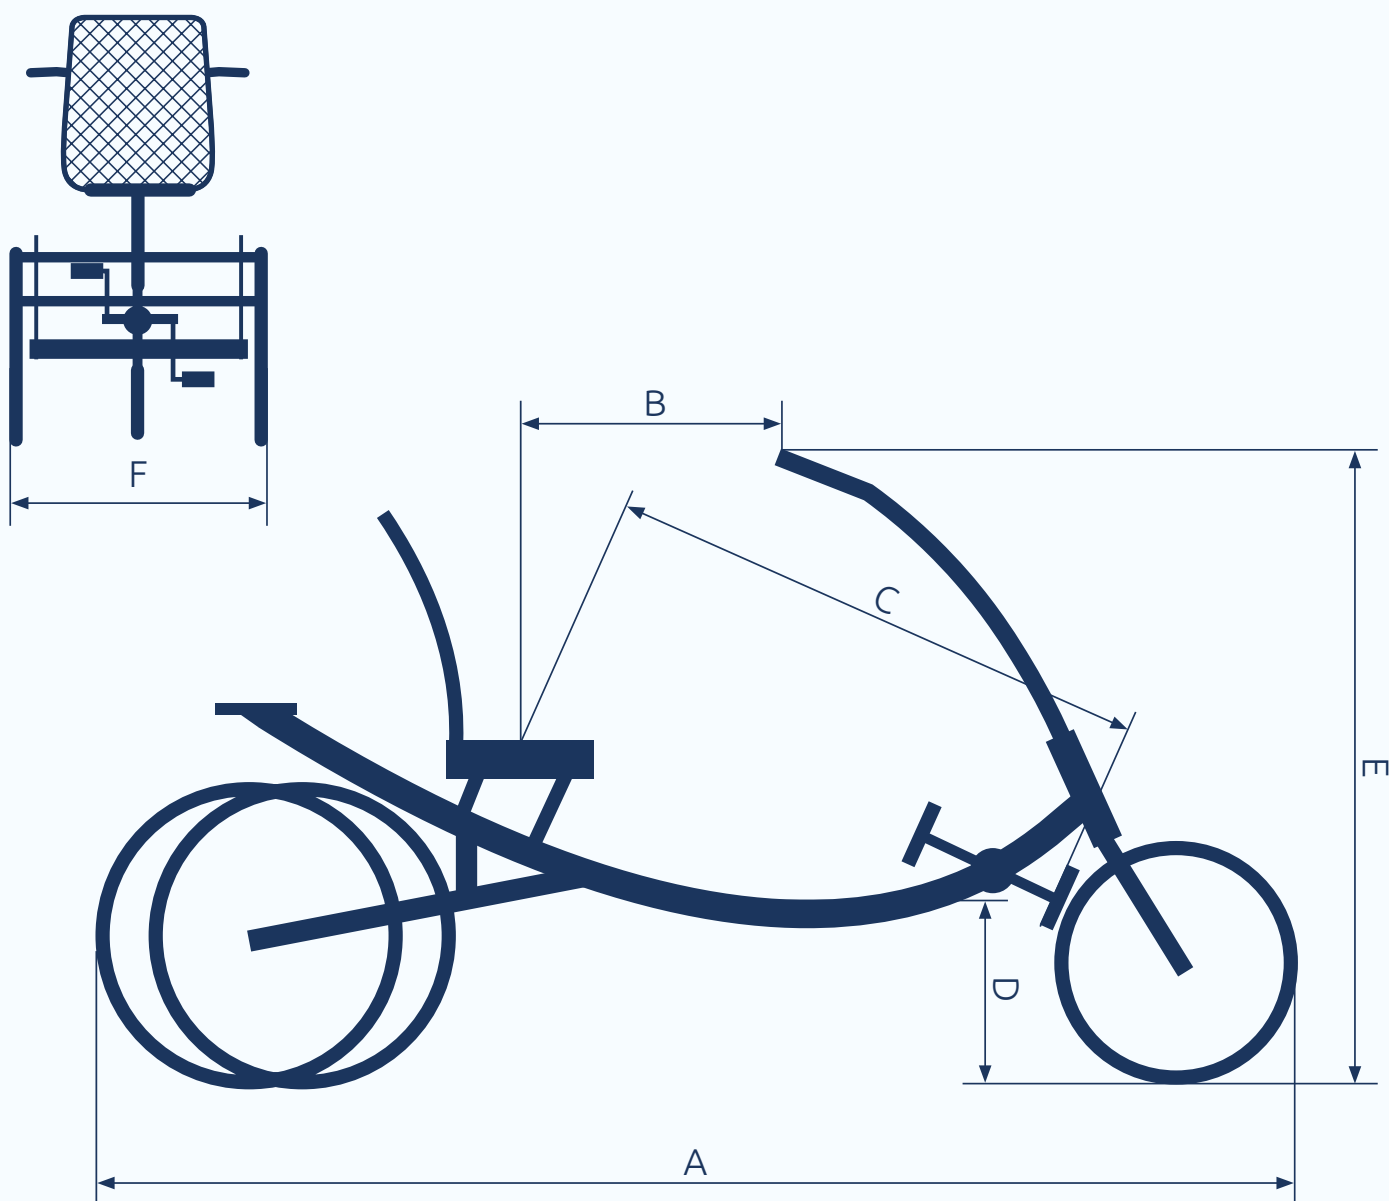

ScooterTrike series – sit back and relax.

ScooterTrike

ScooterTrike FM

The ScooterTrike series stands for riding enjoyment, comfort, and versatility. Whether with or without pedal assistance, the models are easy to handle, feature a stable design, and offer a comfortable seating position. Ideal for getting around town, leisure rides, or everyday use – safe, flexible, and relaxed on every ride.

The riding experience can be tailored to individual needs: choose the ScooterTrike Classic for unassisted cycling, or the ScooterTrike FM with powerful support from an Ansmann front-wheel motor. This makes every ride effortless. The intelligent motion sensor ensures that it is not the applied force that matters, but simply the crank rotation. Just hop on and start pedalling – at your own pace.

RECUMBENT TRICYCLE

Trizon – sporty to the finish.

Trizon

For those who want to ride under their own power without sacrificing comfort, the Trizon is the perfect companion. As a non-assisted recumbent bike, it offers a relaxed seating position, stable handling, and a confident riding experience – ideal for anyone who wants to stay active while enjoying comfort on every ride.

Particularly practical: With the Trizon, you always have everything in sight. The handlebars, pedals, gear controls, and front wheel are all within your field of vision, giving you full control at all times. The generously sized seat is not only comfortable but also easily adjustable in height and angle. This ensures a relaxed riding position as well as clear visibility in traffic.

Riding my recumbent tricycle,
I've lost the fear of tipping over.
Now every ride puts a
smile on my face.

COMFORTABLE FRAME SHAPE

Eno series – a relaxed riding experience.

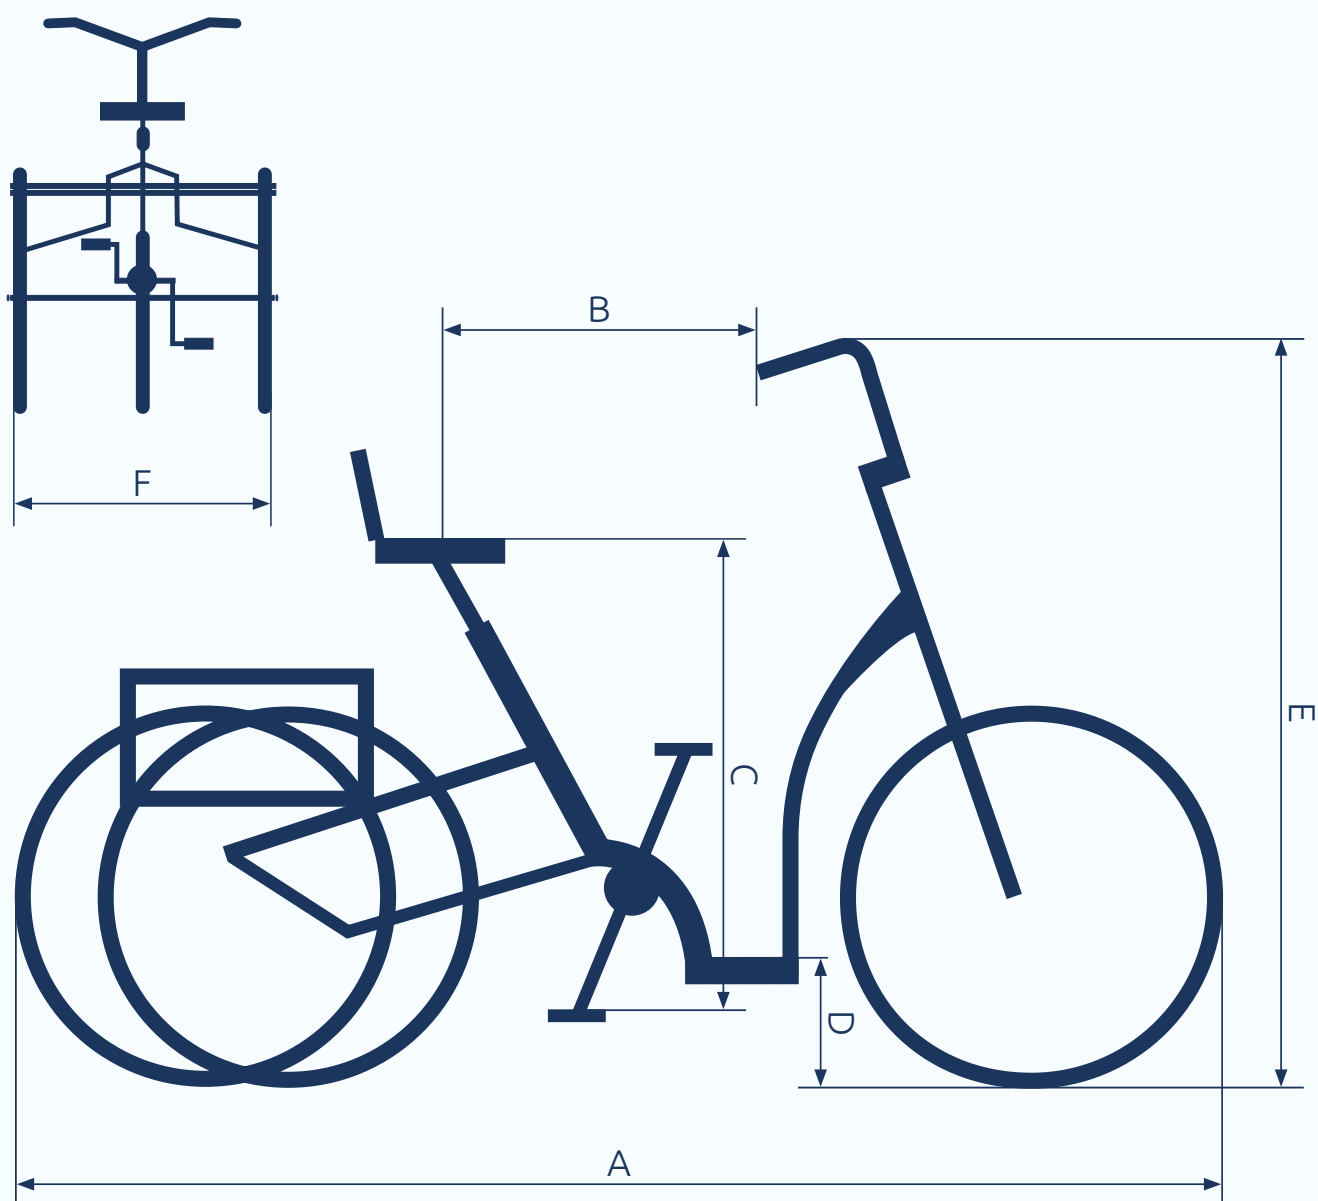

Eno

Eno FM

Eno AP

The Eno series impresses with its well-designed frame geometry and outstanding riding comfort. The seat tube is angled rearward, positioning the saddle further back for a relaxed and comfortable pedaling position. Furthermore, your feet are closer to the ground, making stopping and mounting particularly safe and convenient.

Two motor variants are available, providing reliable assistance tailored to individual needs—whether for short trips around town or extended tours with a range of up to 70 kilometers. Those who place particular emphasis on riding comfort will also benefit from the integrated suspension on the AP variant. It effectively absorbs impacts from uneven surfaces, making every ride significantly more comfortable.

With my tricycle, I am finally independent again – shopping and going out and about has never been so easy!

COMFORTABLE FRAME SHAPE

Tamo series – tailwind included.

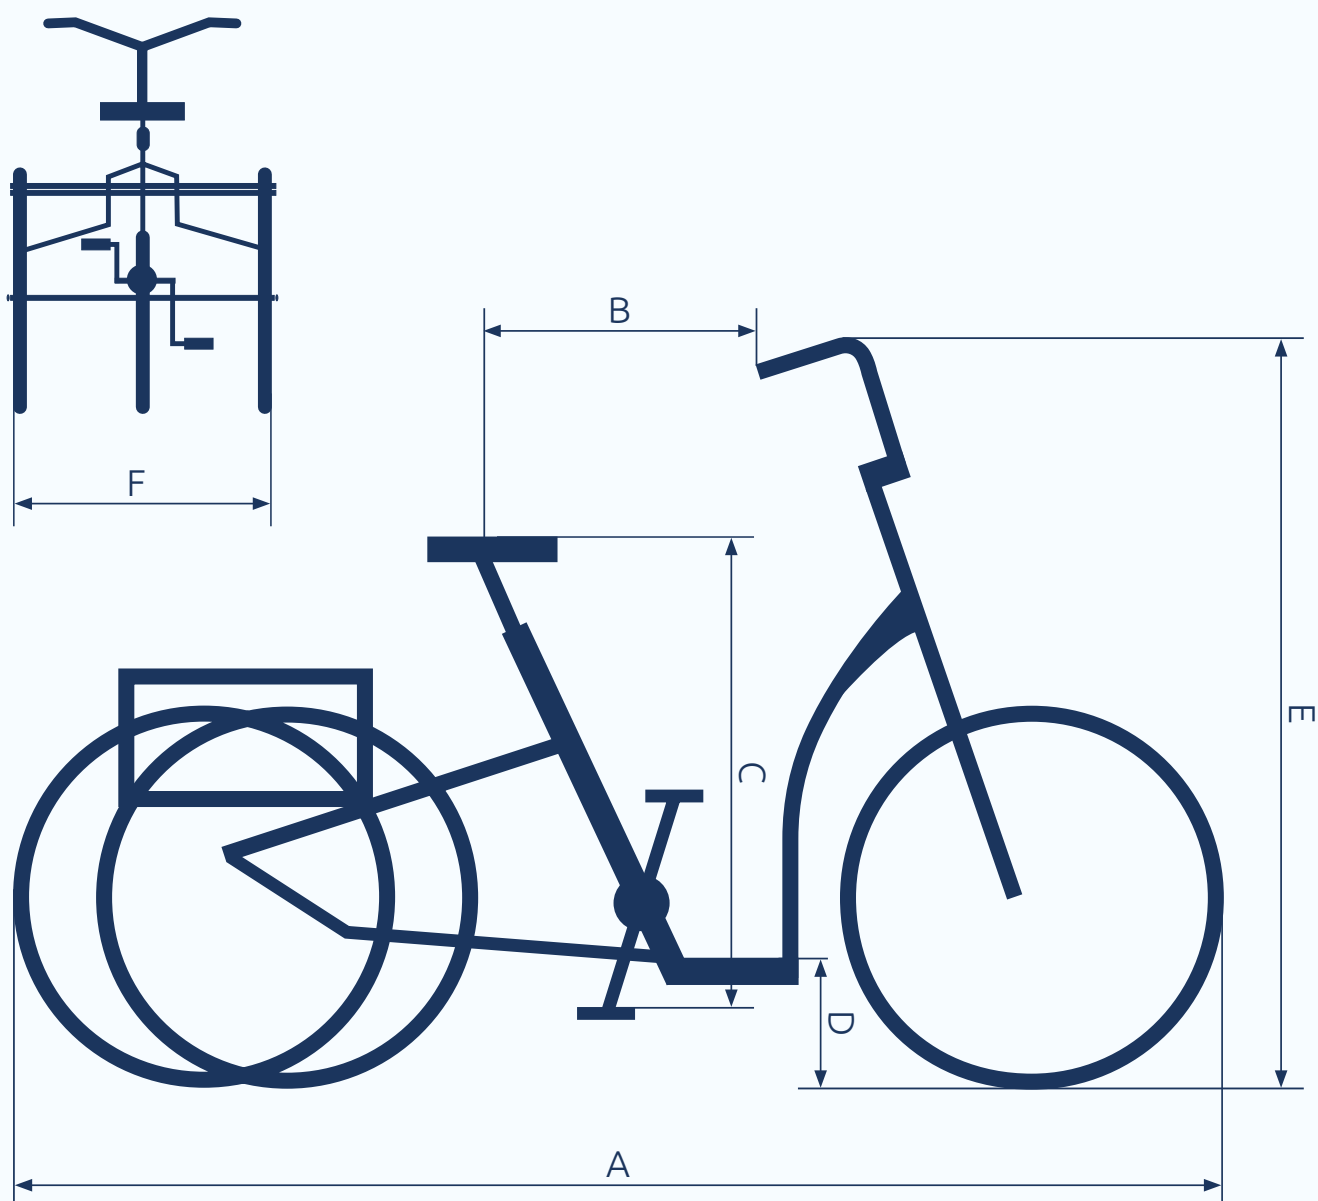

Tamo

Tamo FM

Tamo AP

The Tamo series stands out with its compact design and particularly comfortable step-through access. The short footboard and open-frame design make it easy to get on and off without having to lift your leg high. The adjustable stem can be set for maximum riding comfort and flexibility.

Two motor options are available, providing the right level of support to suit your needs. They are ideal for both short trips and longer rides, with a range of up to 70 km. For additional comfort, the AP version also features integrated suspension, which helps absorb bumps and uneven terrain.

With my tricycle, I stay active and enjoy joint outings – social contact has never been so easy.

SIMPLE FRAME SHAPE

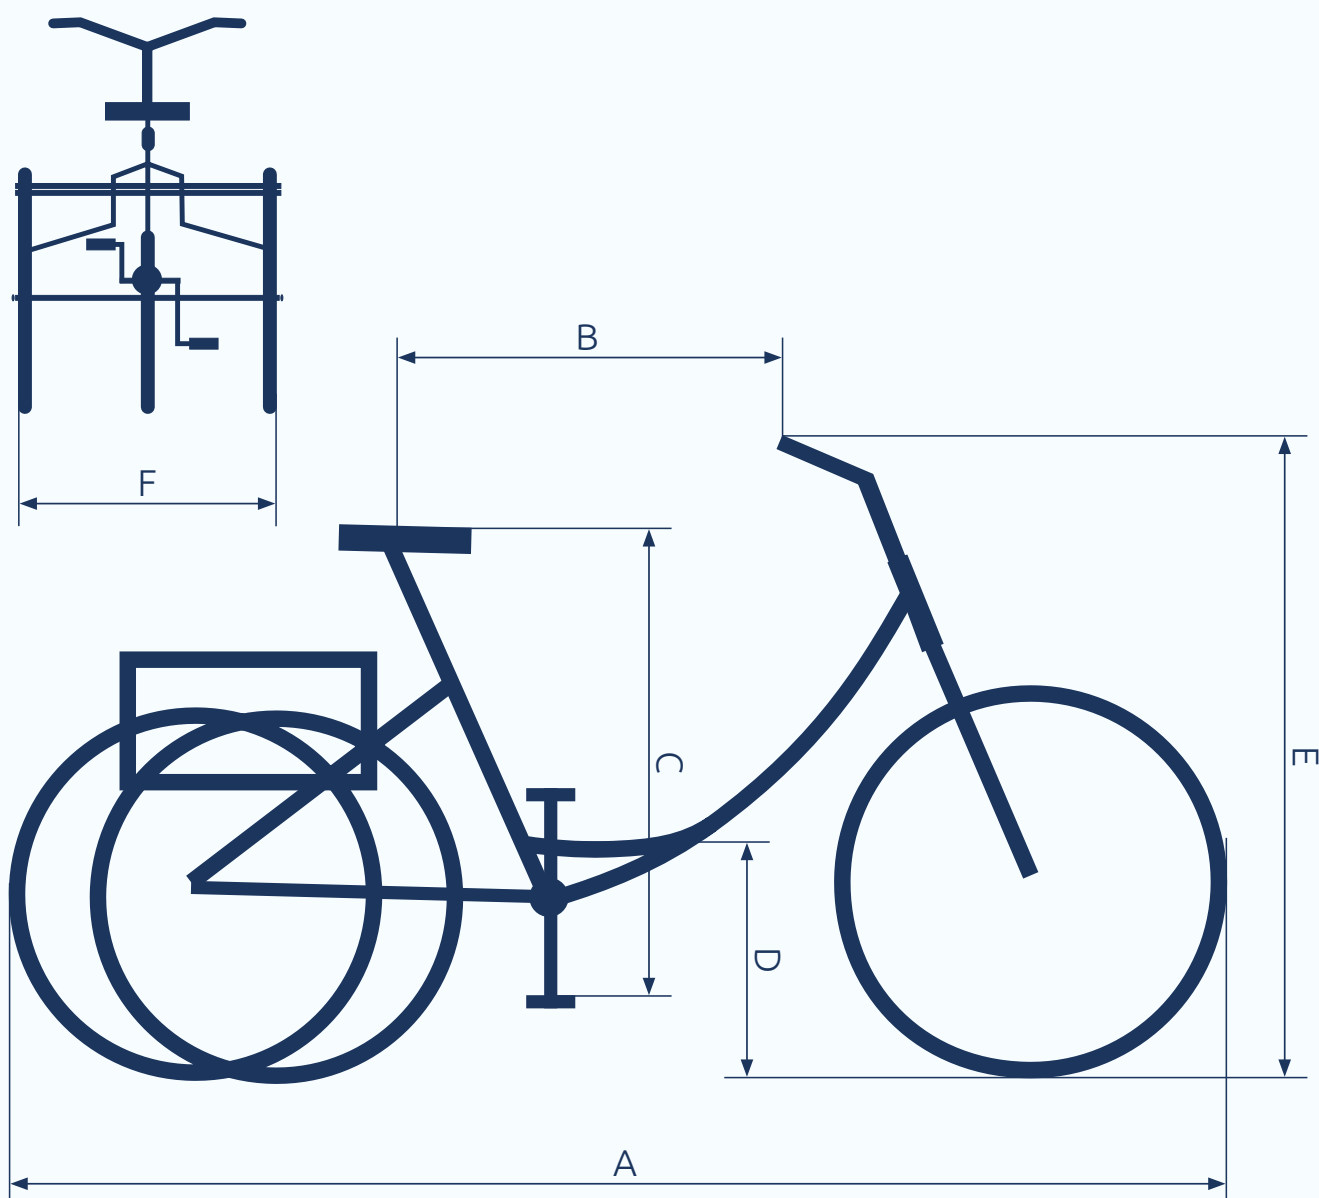

Lano series – safety in a classic design.

Lano

Lano FM

The Lano series perfectly combines safety with a classic design. The frame geometry—from the saddle position to the bottom bracket—creates the familiar feel of a traditional bicycle.

The Lano stands for pure riding enjoyment without assistance, making it perfect for anyone who appreciates a classic, authentic look. Those who prefer a little extra power can opt for the Lano FM, equipped with an Ansmann front motor that is quiet, powerful, and delivers a relaxed riding experience with a tailwind feel.

SIMPLE FRAME SHAPE

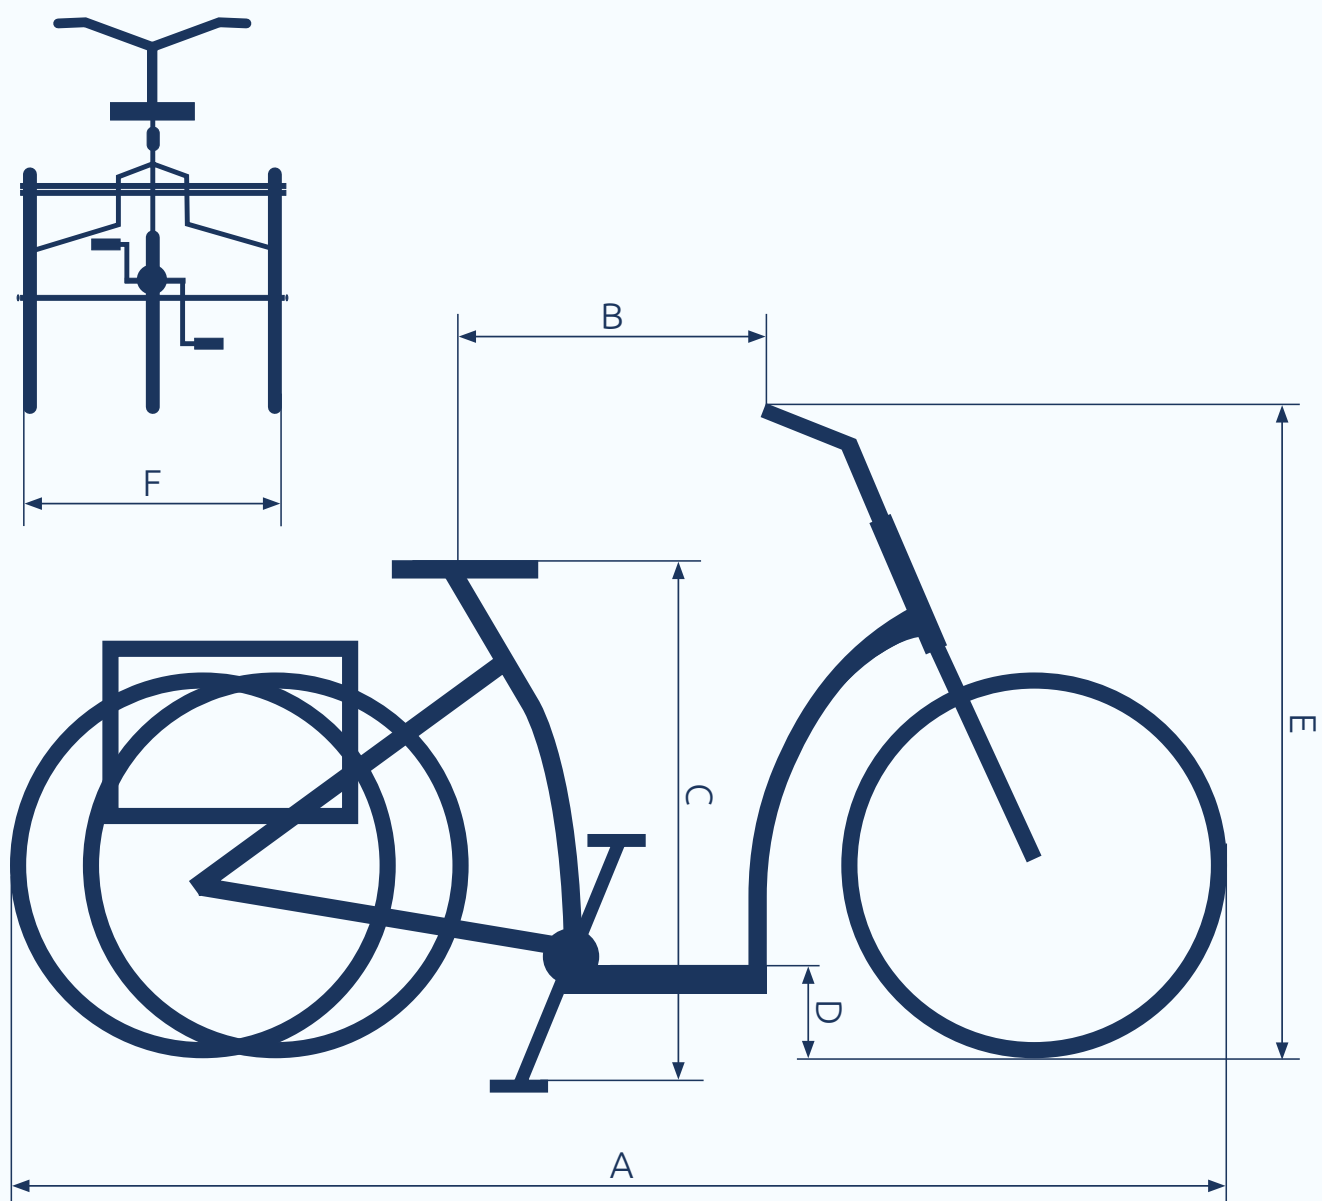

Vida series – stable and not heavy at all.

Vida

Vida FM

The lightweight aluminum frame gives the Vida an exceptionally low weight while maintaining a stable and reliable design. The low step-through frame makes it easy to get on and off—ideal for everyday use. For added comfort, the suspension fork and suspension seatpost effectively absorb shocks from uneven surfaces, making every ride more enjoyable.

The Vida is designed without a motor. It is lightweight, simple, and ideal for anyone who prefers riding without assistance. Those who enjoy a more relaxed pace or want to cover longer distances can opt for the Vida FM, which is equipped with an Ansmann electric drive.

I believe that tricycles have no age limits—just riding enjoyment. For the young, the old, and everyone in between, the most important thing is the ability to get from A to B independently.

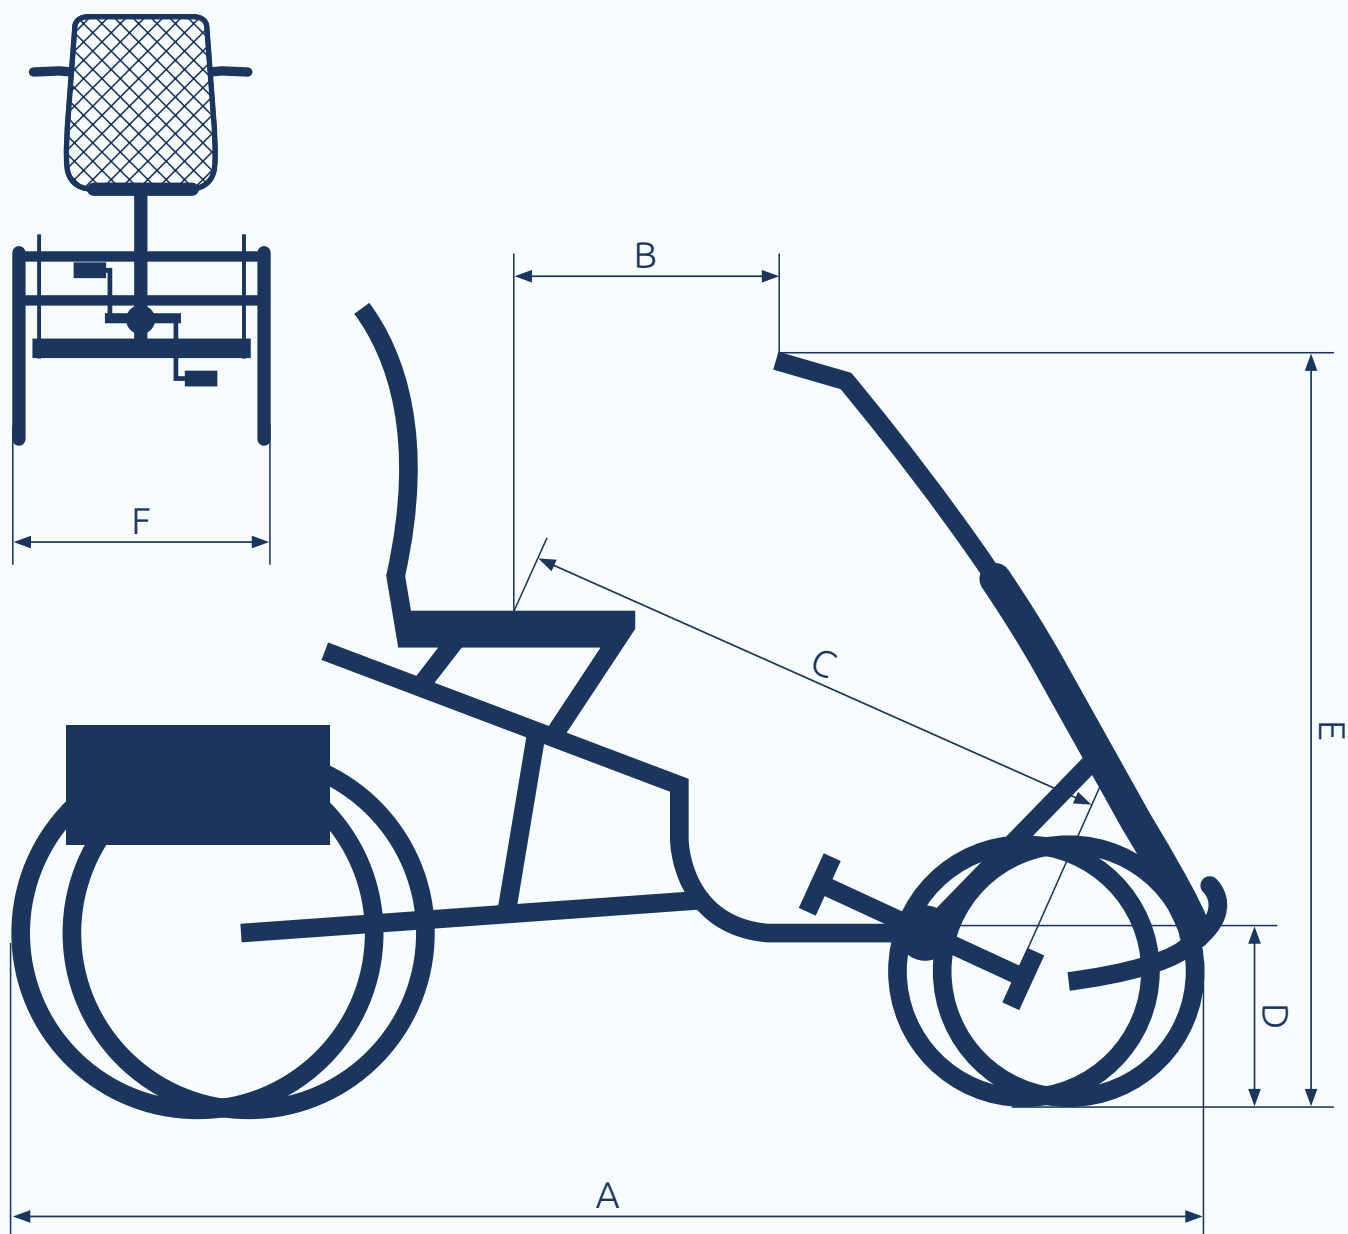

RECUMBENT FOUR-WHEELER

Tibo+ – full steam ahead.

Tibo+

The Tibo+ delivers an exceptionally comfortable ride thanks to the suspension on both the rear swingarm and the front suspension fork. This effectively smooths out uneven surfaces, ensuring a consistently smooth ride. The ergonomic seat can be individually adjusted to suit the rider's height. The wide seat and adjustable backrest allow for efficient power transfer to the pedals—without placing strain on the shoulders, arms, or hands.

The Tibo+ is also suitable for riders weighing up to 180 kg, making it particularly robust and stable. Equipped with a powerful Bosch motor and the precise Rohloff 14-speed internal gear hub, the Tibo+ is one of our premium four-wheelers.

	A	B	C	D	E	F

With my four-wheeler, I can simply stop at a red light without having to get off—it feels safe and comfortable!

MOTOR VARIANTS

Our drive systems.

The drive system is a crucial component for easy and reliable mobility. We rely on a range of systems to meet a wide variety of requirements.

FRONT MOTOR

Quiet, lightweight and powerful.

Lano FM

Vida FM

Tamo FM

Eno FM

ScooterTrike FM

ANSMANN FM 6.0

The Front Motor (FM) principle is very quiet, very lightweight and very powerful. The small, brushless motor with planetary gears is the best example of this. The rider selects the desired motor assistance in up to four levels on the LED display. The practical walk assistance up to 6 km/h is also activated via a push button on the display. Thanks to the freewheel function of the motor, you can feel virtually no resistance even without motor assistance.

BOSCH PERFORMANCE LINE CX (Smart System)

The Bosch Performance Line CX mid-motor delivers powerful, stable support and high reliability. On our tricycles, it ensures confident forward motion and a secure riding experience in all situations. Intuitive operation is provided via the LED Remote on the handlebar, combined with the brilliantly readable Kiox 300 color display. Individual settings can optionally be customized through the eBike Flow App.

BOSCH CARGO LINE (Smart System)

The Bosch Cargo Line mid-motor is designed for heavy loads and demanding rides. It provides powerful, consistent support, high reliability, and maximum control. On our tricycles, it ensures a safe and confident ride. Control is handled via the clear and easy-to-use Purion 200 display on the handlebar, and individual settings can also be customized through the eBike Flow App.

Art. no.: 17-26-01-00043 · €88.90

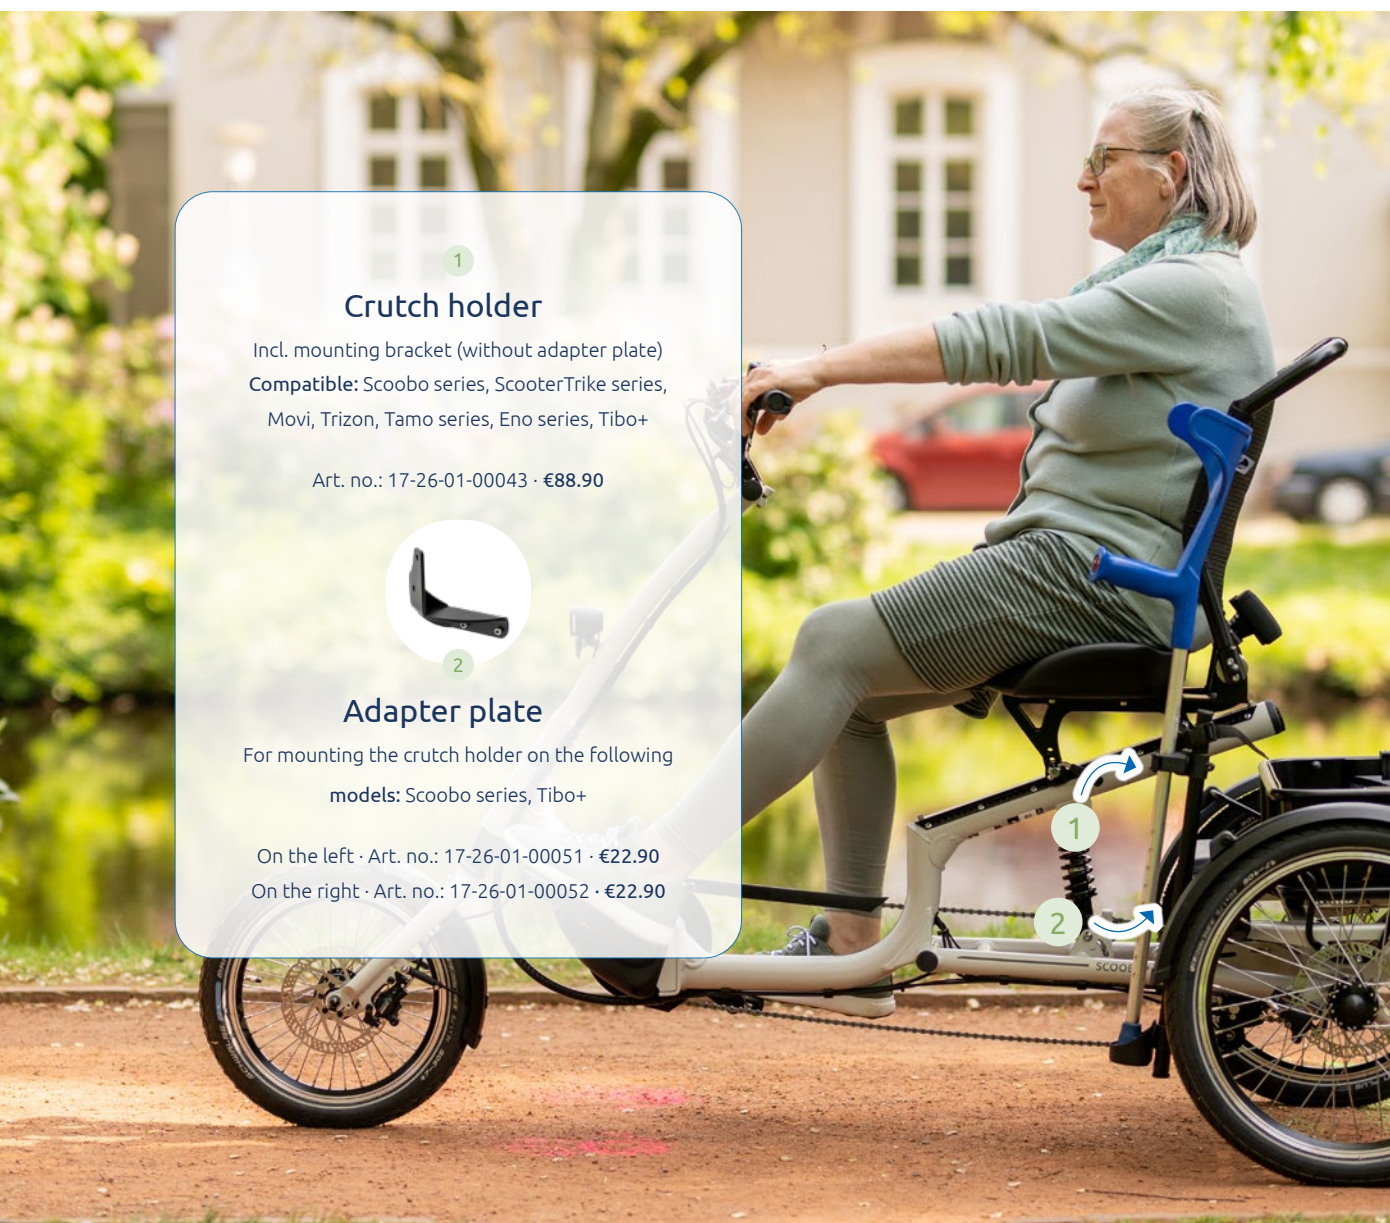

2

Adapter plate

For mounting the crutch holder on the following models: Scoobo series, Tibo+

On the left · Art. no.: 17-26-01-00051 · €22.90

On the right · Art. no.: 17-26-01-00052 · €22.90

Crutch holder set for classic frame shape

For mounting on a classic tricycle

Compatible: Lano series

Art. no.: 17-26-01-00008 · €49.00

Compatible: Vida series, Lasse

Art. no.: 17-26-01-00008 + 17-26-01-00036 · €60.00

Shift support knob (ergonomic)

For shifting gears without much effort

Compatible: Scoobo Smart, ScooterTrike series, Trizon, Lano series, Vida series, Tamo serie, Eno series, Lasse

Art. no.: 17-26-01-00044 · €89.90

Parking brake

Prevents the tricycle from rolling away when mounting or dismounting.

Compatible: all models with a mechanical rim brake.

Art. no.: 17-02-02-00083 · €79.00

Foot rest adjustable leg guide

To stabilise the legs and feet

Compatible: all models

Art. no.: 17-26-01-00002 • €399.00

Home trainer pedals

For easy and quick attachment

Compatible: all models

Art. no.: 17-01-01-00046 • €27.90

Foot anchorage

Prevents the foot slipping forwards

Compatible: all models

Art. no.: 17-26-01-00010 • €85.00

Foot rest

To stabilise the feet

Compatible: all models

Size < 40 • Art. no.: 17-26-01-00013 • €160.00

Size 40-43 • Art. no.: 17-26-01-00014 • €160.00

Size > 44 • Art. no.: 17-26-01-00015 • €160.00

Treadle crank for disabled

Decreasing the pedalling radius

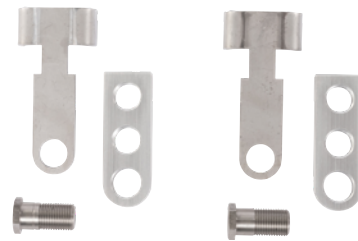

Compatible: all models

On the right · Art. no.: 17-26-01-00030 · €269.00

On the left · Art. no.: 17-26-01-00031 · €269.00

Crank shorteners with adapter

To compensate for shortening of the legs

Compatible: all models

Without adapter · Art. no.: 17-26-01-00007 · €60.00

Adapter · Art. no.: 17-26-01-00029 · €15.00 each

Crank shortener roundly for left and right

To shorten the distance between the pedals and the saddle

Compatible: all models

Art. no.: 17-26-01-00037 · €99.00

Therapy supports

Retrofit kit for an existing bicycle (not a pedelec)

Compatible: Two-wheelers with hub gears without motor assistance.

16" · Art. no.: 17-20-01-00002 · €495.00

Have you already had contact with us and are satisfied?

Share your positive experiences with a review on Google. Simply scan the QR code to go to our Google review page.

Should you have a reason not to award 5 stars for our service and performance, please contact us directly. A high level of customer satisfaction is very important to us.

NEW

Tricycle or bicycle?

pfautech has both – comfortable tricycles and safe low-entry bicycles.

Thanks to the special frame shape of the Smoo model, stopping becomes very safe – **just stay seated, feel both feet firmly on the ground, relax and take a deep breath.** Perfect for traffic lights, crossroads and anyone who wants to rely on their bicycle.
