WORLDWIDE.

Glass Restoration

Our innovative process prevents the magnifying glass effect and ensures no material is lost during restoration. The result: clear, flawless surfaces – without waste, without replacement.

Glass Scratch Removal:

Repairs on float glass, laminated glass (VSG), toughened glass (TVG, ESG), and polycarbonate surfaces.

Spark Damage Repair:

Residue-free removal of damage caused by cutting or grinding sparks on glass surfaces.

Surface Etching Restoration:

Special polishing techniques to eliminate etching and corrosion from cement or concrete exposure.

Our Technology

Precise grinding and polishing processes to remove scratches from a glass window

YOUR BENEFITS

Save Money. Time & Materials.

Axis Project provides sustainable restoration solutions that reduce waste, avoid unnecessary replacements, and deliver architectural perfection.

Lower Cost: Savings on material, transport and production costs

Save Time: Quick repairs without operational downtime

Sustainability: A resource-saving alternative to new production

Restoration: Look, feel and shape just like new

THE RESTORERS.

SUSTAINABILITY

OUR WORK IS INHERENTLY GOOD FOR OUR PLANET

OUR SUSTAINABILITY LIES IN THE EFFICIENCY OF OUR PROCESS – EXTENDING THE LIFECYCLE OF MATERIALS, REDUCING WASTE, AND CONTRIBUTING TO A MORE RESPONSIBLE CONSTRUCTION INDUSTRY.

Our core focus is to **repair rather than replace** – preserving valuable resources and avoiding the environmental impact of producing, transporting, and installing new components.

By restoring instead of replacing, we also **prevent collateral damage** to surrounding elements – a common issue during conventional replacement work.

We're fully aware of the **energy consumption** linked to disposal and recycling, and we actively minimize it through targeted, **low-impact repair strategies**.

For durability and resistance to cleaning agents, we use **solvent-based coatings** to ensure better Quality – always balancing environmental impact with long-term functionality.

REPAIR INSTEAD OF REPLACE.
