

# PLx1.4 65-E Asph

The PLx1.4 65-E Asph expander is designed to allow the use of most of the FF and VV lenses on the new 65mm digital cameras. The projected image diameter and the focal length of the lens is increased by a factor of 1.4.

The PLx1.4 65-E Asph. is characterized by a robust and durable mechanical design with stainless steel PL mounts and anodized aluminum.

Inside it carries high-index low-dispersion glass and aspheric lenses to ensure the highest possible resolution and contrast with minimal optical degradation, while the flare minimized surfaces keep the original lens character.

The electronic metadata pass-through has been introduced to bring the lens information to the recorded takes.

It is not compatible with mirror cameras, nor the UMS system.

## FEATURES

- Electronic pass-through for lens metadata
- 60mm image diameter (65mm sensors)
- High-index, low-dispersion glass
- Robust Mechanical Design
- Extended Color Correction (APO)
- Small & lightweight

## TECHNICAL DATA \*\*

Max. Image Diameter (mm)	60 mm / 2.36"	Camera / Lens Mount	PL / PL
Magnification	1.4x	Light Drop	1 stop
Electronic Data	Pass-through	Optical setup	2 lenses / 2 aspheres / 3 groups
Max. T-Stop transmission	1.4	Weight	0,7 kg / 1.5 lbs
Max. recommended T-Stop	1.9
