

IB/E Extender Compatibility List

PLx Extenders are compatible with almost all cameras whose sensor fits within the Extender's Minimum Image Circle projection.

For non-PL mount cameras, the appropriate Universal Mount System (UMS) mount will be necessary. The UMS allows quick and easy changing of camera mounts on an IB/E Optics lens adapter.

-PLx2 Extender

Minimum Image Circle Projection: 32mm

Maximum Input Aperture: f1.8

2x Extender

-PLx1.4 Mark II Extender

Minimum Image Circle Projection: 34.5mm

Maximum Input Aperture: f1.6

1.4x Extender
