

LECO-UWB-S5 Training Course

Our team hosted a comprehensive LECO-UWB-S5 training course, in collaboration with Lestin. Participants gained valuable theoretical insights into our high-performance epoxy corrosion protection system, followed by hands-on training to master its application. With individual guidance for each attendee, we emphasized the importance of proper surface preparation. All participants received official diplomas, certifying their expertise. We invite you to join our future training courses to enhance your skills and knowledge!
