Advancing Personalized Medicine: A Spotlight on Organ-on-Chip

Speakers

Distinguished leaders from academia and industry

- **Interactive Sessions:** Hands-on activities and collaborative discussions.
- **Expert Insights:** Learn from industry leaders and seasoned professionals.
- **Networking Opportunities:** Connect with like-minded peers and expand your network.

- **Organ-on-Chip Advances** – Exploring microfluidic platforms, 3D tissue engineering, and biosensor integration.
- **Next-Gen Personalized Medicine** – Harnessing patient-derived models, AI-driven drug discovery, and precision therapeutics.
- **Translational Research & Commercialization** – From academic breakthroughs to clinical and industrial applications.
