

ModTruss®

AUDIO + VIDEO INTEGRATION

Temporary + Permanent Installations

© 2nd Half Final - EUROVISION SONG CONTEST MALMÖ

The **ModTruss** Extrusion and Truss Series have become top choices among audiovisual integrators for rigging infrastructure. Whether used in places of worship, theaters, universities, entertainment venues, commercial spaces, or anywhere in between, **ModTruss** has the solution.

ModTruss is a revolutionary approach to designing and building structures of all types for all industries.

Our Solutions are:

-  Off the Shelf
-  Modular and Reconfigurable
-  Pre-Engineered

Resulting:

- Faster Lead Times
- Predictable Builds with Unlimited Possibilities
- Faster Design Time

EX EXTRUSION SERIES

Available in three profiles, **ModTruss** Extrusion Beams and Columns offer high load capacities and long spanning capabilities, all while maintaining a low-profile, aesthetically pleasing appearance.

ModTruss ACCESSORIES

ModTruss T Rigging Mounts and Beam Clamps can be placed anywhere along a **ModTruss** Extrusion Beam, for ultimate rigging versatility. **ModTruss** also offers a range of accessories including base plates and more to help complete your project.

Seamlessly integrate rigging, lighting, audio, and video components using **ModTruss** "Insert Nuts" and "Nut Bars."

- **"Keder Track"** on each of the four corners of the extrusion profiles are a great way to add curtains, banners, or screens.
- The **Sleek, discreet profile** of the extrusion beam is a leading reason that many worship space integrators specify ModTruss for its rigging infrastructure.
- The Mod**Truss** Extrusion can be provided in continuous lengths up to 20' and cut to custom lengths within inches to efficiently meet desired beam requirements like never before. Curved and Radiused Extrusion beams are also available.
- All Mod**Truss Extrusion Profiles** are completely compatible with the ModTruss Truss Series. Combining the 2 series provide a great solution for ground supported A/V integration.

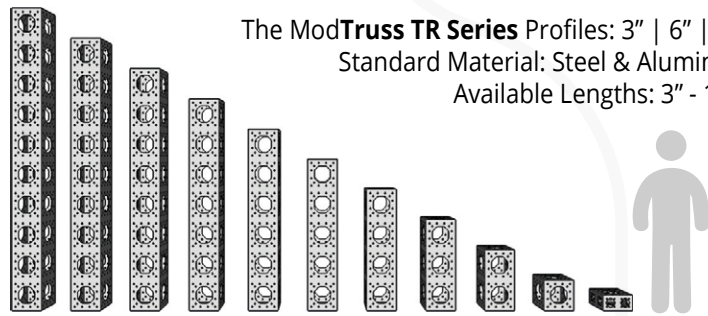

TR TRUSS SERIES

With 6" axis connectivity every 3" Mod**Truss** is a highly versatile solution for any rigging infrastructure challenge.

The Mod**Truss TR Series** Profiles: 3" | 6" | 12"
Standard Material: Steel & Aluminum
Available Lengths: 3" - 120"

Mod**Truss** 6" Series

Mod**Truss** 12" Series

ADVANTAGE

The 6" x 12" and 6"x6" Mod**Truss** Extrusion are connected internally offering a seamless continuous look to the beam or .

MODCAPABLE

Video wall header bars mount effortlessly into the Mod**Truss** Extrusion track for a clean and seamless integration.

Black anodizing or powder coating in nearly any color of the Mod**Truss** line adds to the ability to blend with the architect's vision of the facility.
