

Project Completion in Vienna's 22nd District

KWTS is pleased to share the successful completion of our commercial diving services for the major infrastructure project in Vienna's 22nd district. Over 18 months, we provided inspections, cleaning, and concreting for all water-related aspects, while working closely with the City of Vienna and partners like Porr, Strabag, and Züblin. Our team's hard work has played a vital role in enhancing Vienna's infrastructure, and we are grateful for the opportunity to contribute to this important project for the city.
