

☀️ Sculpt treatments for \$200 off!!

- **Stubborn fat that won't budge?** → TruSculpt iD
- **Want skin tightening too?** → Bonus collagen boost with RF energy
- **Busy lifestyle?** → 15–30 min treatments, no downtime

Real YBA Patients! Visible **Results** after **ONE** TruSculpt!

What it is:

TruSculpt uses monopolar radiofrequency (RF) energy to heat and permanently destroy fat cells. Your body naturally clears these damaged cells through the lymphatic system over time. In addition to fat reduction, the RF energy stimulates collagen, improving skin firmness and tone.

What to Expect:

- **Treatment Time:** As short as 15 minutes per area (longer if multiple zones).
- **Comfort:** noninvasive, Feels like a warm “hot stone massage.” No numbing required.
- **Downtime:** Minimal to none — resume normal activities right away. Mild redness or tenderness possible.
- **Results:** Early improvements may appear within weeks, with most visible changes in 6–12 weeks.

Why You'll Love It:

- Non-surgical fat reduction with skin tightening benefits
- Treats stubborn areas resistant to diet and exercise
- Short, comfortable sessions and little to no recovery time
- Paired with our **InBody scan** to track true body composition
